PROFILE:

Software engineer specialized in modern web and mobile development. Passionate about creating scalable, high-quality applications and solving complex problems. Strong focus on TypeScript ecosystems, performance optimization, clean code, and user-centric design. Always learning, improving, and building software that genuinely impacts people and businesses.

EXPERIENCE:

Prestavale - Software Engineer (Dec 2024 - Present)

- Leading the development and maintenance of corporate web applications and the Prestavale mobile app, acting as the technical lead. I work directly with the CEO to gather requirements, estimate tasks, and guide the development team.
- Rebuilt an 8-year-old legacy system, improving design, security, code quality, performance and accounting integrating a third party core banking provider.
- Migrated manual prospecting workflows into a fintech-style automated pipeline, significantly increasing efficiency and revenue.
- Contributed to accounting, UX enhancements, and scalable backend improvements.

Ola technologies - Full stack developer (Feb 2024 - Aug 2025)

- Performed maintenance and UI/UX improvements for web apps **Gensoil** and **EMEAT** (ReactJS + NodeJS/Express).
- Fixed bugs, enhanced performance, added new features, and improved user flows.
- Migrated the EMEAT mobile app (React Native/Expo) from SDK 48 to SDK 51.
- Converted JavaScript codebase to TypeScript, increasing reliability, readability, and maintainability.

SKILLS:

Language & Frameworks:

- TypeScript · JavaScript · Node.js · NestJS · ReactJS · React Native (Expo)

Databases:

- SQL · NoSQL

Tools & Platforms:

- Git · GCP · REST APIs · Agile Development

EDUCATION**Instituto Tecnológico de Culiacán**

B.S in Computer Systems Engineering

2020 - 2024
